

Reliable Diagnostics - Sustainable Solutions - Trusted Integrity

At Core Diagnostics, we identify and resolve issues across the full spectrum of electrical control and instrumentation systems. Our root-cause approach delivers lasting results—driven by a commitment to safety, integrity, and honesty.

OUR SERVICES

Advanced Troubleshooting & Root Cause Analysis

- Pinpoint recurring, intermittent, and complex control issues
- Expertise in PLC/DCS systems and control loops

Instrumentation & Controls Commissioning

- Calibration, loop checks, sensor verification
- Transmitter configuration & signal conditioning
- Diagnostics to ensure peak performance and reduced downtime

Functional Safety Field Testing

- Third party testing of safety instrumented system (SIS) devices
- Compliance, audit readiness, and best-practice implementation

Training & Consulting

- On-site technical training for maintenance teams
- Consulting to build long-term system reliability

Calibration & Test Procedure Development

- Create or refine testing protocols
- Improve efficiency, compliance, and audit documentation

30+ Years Combined Experience | Mining • Oil & Gas
